Subject: RE: MS4 illicit sampling

Importance: High

Ray,, Location of the manholes are they in the roadways or on the Gateway land? Need to check for a police detail and what gear to open covers.

Dale

Subject: MS4 illicit sampling

Dale,

i was just informed our lab has an opening to sample the MS4 line: 1 PM this Wed. the 10th.

Erin Trainor from our lab will be at the site at about 1 PM and we'll need someone from the Town who can open a catch basin or two for her.

i'm not sure where exactly the sample is to be collected – i.e., from the flow-in diversion structure or from a catch basin (CB) near South St. i'm sure it won't take long to figure out. dry weather flow is adequate for this sampling. i think we're still seeing some baseflow . . .

fyi, Erin plans on inspecting the Chatham MS4 at about 11:30 AM on Wed., . . . not sure how long this will take, so if she's not on-site at precisely 1 PM, her cell # is 617.223.1369.

let me know if you have any questions or if there is a problem with scheduling. 617.650.1345 (cell).
